Skills

Programming Languages

Kotlin, Java, C/C++, Python, JavaScript, PHP

Web Development

HTML, CSS, JavaScript, Node.js

Mobile Development

Android Studio, Kotlin, XML, Firebase Authentication

Database

MySQL, Firebase Firestore

Cloud/Backend

Firebase, Node.js

Tools & Technologies

Git, GitHub, VS Code, XAMPP

Education

B.Sc. in Computer Science and Engineering (CSE)

Premier University, Chittagong
Expected Graduation: 2026

Certifications

Internship Certificate

Android Developer Internship, Tori IT

Summary

Computer Science and Engineering (CSE) student graduating in 2026 and aspiring Software Engineer with hands-on experience in Android application development. Familiar with web development, databases, Firebase, and modern development tools. Independently built and delivered software projects, including a native Android booking application developed end to end. Interested in Full-Stack Web and Mobile Application Development; seeking an entry-level Software Engineering opportunity.

Internship Experience

Android Developer Intern, Tori IT

September – October 2026

- Developed CleaningServiceApp, a native Android cleaning service booking application, end to end using Kotlin, XML, and Android Studio.
- Integrated Firebase Authentication and Firebase Firestore for user accounts and booking data, and managed source code with Git and GitHub.

Projects

CleaningServiceApp – Native Android Cleaning Service Booking Application

Kotlin, XML, Android Studio, Firebase Authentication, Firebase Firestore, Git, GitHub

- Developed a native Android application that lets users browse cleaning services and book them digitally, replacing manual booking arrangements.
- Implemented user login, registration, and forgot-password flows using Firebase Authentication.
- Built the booking workflow covering service selection, date and time selection, address collection, and a My Bookings screen for booking management.
- Designed an admin dashboard for booking management and used Firebase Firestore as the application database.

Video Player App – Android Application

Kotlin/Java, Android SDK, Android Studio

- Developed an Android application providing video playback functionality using the Android SDK.
- Built the application in Android Studio with Kotlin/Java.

Food Order & Management System – Web Application

HTML, CSS, XAMPP

- Built a web application for displaying food items and placing food orders.
- Implemented user login and registration, a shopping cart, and order status tracking.
- Configured a local development environment using XAMPP.
